

RADIO COLLECTION

Los Angeles, CA - May 2024. For immediate release.

Introducing the Radio Collection - where industrial chic meets wavy sensuality. The brand new Radio Collection, inspired by the symmetrical form of radio frequency waves reminiscing the era of Edison and Marconi mixed with the curious aesthetics of classic radiators, it fused the two eras together with exquisite design to bring an audacious edge to your bar. With its distinctive silhouette yet subtle blend of geometry and curves, the Sempli Radio collection is not just glassware - it's a conversation starter. Elevate your entertaining style and indulge in the raw yet sophisticated allure of the Radio Collection.

It's where industry meets elegance; it's where your bar comes to life. This hand-blown process gives each piece an elegant feel with superior clarity to highlight the color of each beverage.
